

A pedestrian is **killed or injured** in an intersection crash every 16 minutes.

Are you doing everything you can to protect them?

DID YOU KNOW...

most drivers don't know that pedestrians have the right-of-way over motor vehicles?

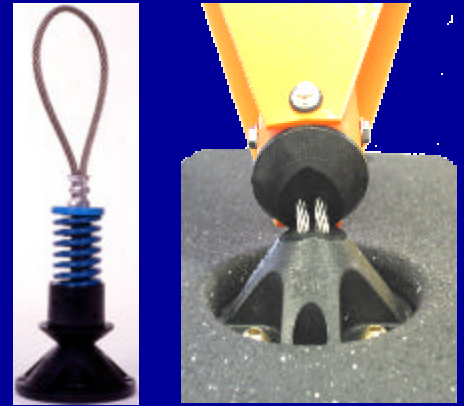

many drivers don't stop for pedestrians in crosswalks and intersections?

every year over 4,800 pedestrians die and an additional 71,000 will be injured?

Impact Recovery Systems Flexible MUTCD In-Street Pedestrian Crosswalk Sign

Unique Reactive Spring System with new Anti-Twist feature

The new "Anti-Twist" feature enables the sign to remain facing traffic after impact.

Our products combine high impact plastics and energy absorbing mechanics, resulting in the industry's first truly flexible delineation system.

- Fully tested and NCHRP350 approved.
- Designed to take multiple impacts and still re-orient towards traffic.
- Signs are manufactured with 3M Diamond Grade Fluorescent Yellow Green Sheeting with White Hi-Intensity Sheeting Insert.
- Available with portable or permanent surface mount versions.

As per the April 2004 issue of "Issue Briefs" published by the Federal Highway Administration and the Institute of Transportation Engineers:

"Consider using MUTCD Sign R1-6: STOP FOR PEDESTRIANS or YIELD TO PEDESTRIANS signs can be placed at crosswalks without signals in central business districts and other areas of high pedestrian activity to reinforce and remind drivers of the laws regarding the right-of-way of pedestrians."
