

Energy for life

 **MAX**
SELF SUFFICIENT RADIO

The Freeplay EyeMax Self-Sufficient Radio

The Freeplay EyeMax Radio delivers a fascinating new sensory dimension to radio listening. The crystal clear casings flaunt the complex workings of the radio and engage the user in the science of converting human energy into pure listening pleasure. The compelling design grabs immediate attention; it not only sounds great - it looks great too.

Offering a choice of wind-up, solar and rechargeable power, the EyeMax incorporates the latest in Freeplay's self-sufficient technology - which means unparalleled sound quality, playtime performance, dependability, and durability.

In a compact, fun and stylish design, the EyeMax FM/AM Radio is fitted with a DC input facility to accommodate the AC/DC adapter/charger (supplied) and an earphone socket for personal listening.

The Freeplay EyeMax will play for approximately 35 minutes at normal volume per 30-second wind, and can be rewound at any time for as much playtime as you want. An LED charge level indicator tells you the best speed to wind. And in direct sunlight the EyeMax will charge itself and play continuously without winding. The internal Ni-MH battery can be fully charged from the solar panel or the AC/DC adapter. The Freeplay EyeMax will give 25 hours of playtime, depending on volume, when fully charged.

Built around the proven Freeplay power train and radio platform, the EyeMax is fun and enticing whilst still offering failsafe listening that's convenient, anytime, anywhere.

With the Freeplay EyeMax you can have music wherever you go.

Fold handle out fully and wind in a clockwise or anticlockwise direction for fail-safe reception anytime, anywhere.

Crystal clear

Power Source:
Wind up AC alternator driven by the crank via a transmission

Solar High performance amorphous silicon solar panel deposited on a 3 mm glass pane with a 4.8V 37mA output

Charging Adapter 6V 100 mA AC/DC adapter (1.2mm centre pin positive jack)

Rechargeable Battery Non-removable rechargeable Ni-MH battery pack

Playtime:
Fully recharged battery - 25 hours (normal volume)
30-second wind - 35 minutes (normal volume)
Note: Playtime will vary between volume settings.

Adapter Charge rate:
24 hours - 100% capacity

Frequencies:
FM 88-108 MHz
AM 500-1700 kHz

Speaker:
Size: 66mm (2.6 inches)
Impedance 8 ohms
Output 0.5 watt (max)

Antenna:
FM Telescopic
AM Built in ferrite bar

Available Accessories:
Cigarette lighter adapter

Dimensions:
Metric mm (Imperial inches)
Height 112 (4.4) Width 60 (2.4)
Length 186 (7.3) Weight 700g (24.5 oz)

Packaging dimensions:
Metric mm (Imperial inches)
Retail Box Height 82 (3.2) Width 200 (7.9)
(Fits 1 radio) Length 243 (9.5) Weight 1.1kg (2.4 lbs)

Inner carton Height 190 (7.5) Width 420 (16.5)
(Fits 4 radios) Length 260 (10.2) Weight 4.7kg (10.4 lbs)

Outer carton Height 220 (8.7) Width 440 (17.3)
(Fits 2 inner Length 550 (21.7) Weight 10.1kg (22.4 lbs)
cartons or 8 radios)
